## We asked to one of our clients why they love the Polti Cimex Eradicator. Here is what they said:

**Who:** Housing Authority

**Dimension:** 12 Public Housing communities with 1,208 units for families and senior/disabled individuals.

**Infestation:** Bed Bugs

**Units infested:** Different types of apartments, due to tenants bringing in used furniture.

### Why did you purchase the Polti Cimex Eradicator? Was it to prevent or treat an ongoing infestation?

We had chemically treated our unit in the past, however it used to take 2-3 times to eradicate the problem.

I ran over to the sales rep of POLTI and I knew that was what we needed. It is a safe tool for the employees and very easy to use.

We did a break-even analysis on our return on investment and it was worth buying.

### When and how often have you used it?

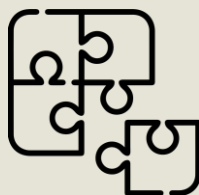

2 or three times now. In a year, 99% of our units don't have bedbugs, but it is still worth to have the Eradicator for the 1%.

## What are the main advantages of using the Polti Cimex Eradicator for you?

### 100% EFFECTIVE

Thanks to the use of steam, we don't have to pay for more treatments (as we used to). Efficacy is our top priority.

### PLUG AND PLAY

The Polti Cimex Eradicator is extremely easy to use, fast safe, and of good construction.

### RETURN ON INVESTMENT

We did a break-even analysis on our return on investment and it was worth buying.

### Were you able to solve the problem for those units?

Yes, so far it has been 100% effective.

### Was the Eradicator the only tool used, or was it paired with something else?

No, it wasn't paired with anything. It works by itself.

### Do you follow a specific protocol/process when dealing with bed bug infestations?

Since we purchased more than two Cimex units, a Polti product specialist came to our site and did a training session for all our maintenance department. Once the employees are trained, it is easy and fast to use.
